

NexusAI - Secure Orchestration for AI Agents

Wagner Medeiros dos Santos

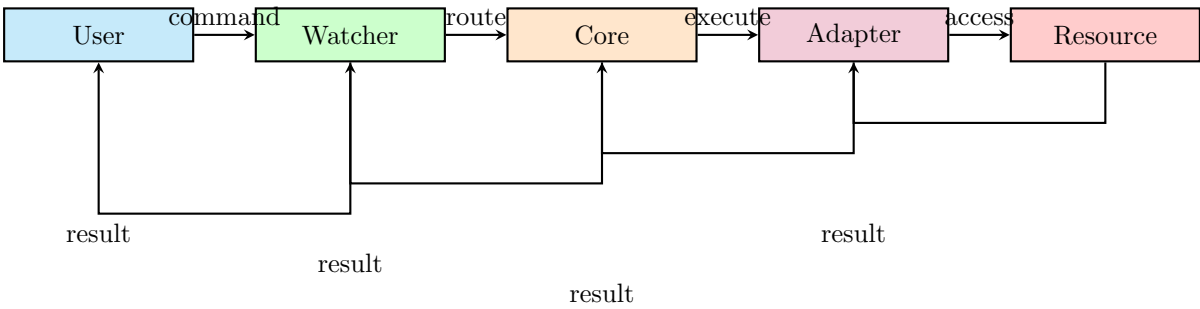

May 2026

Alabama Launchpad Cycle 2 2026
HelpUS LLC - Gulf Shores, AL

1 System Architecture Diagram

2 Data Flow

3 Layer Descriptions

Layer	Components	Function
Client Layer	ChatGPT, DeepSeek, Gemini, API	User interaction interface
Gateway Layer	Watcher	Command extraction, routing, monitoring
Core Layer	Broker, Orchestrator, Agent	Execution decision (fast path or AI reasoning)
Adapters Layer	Files, Databases, Browsers, Scripts	Controlled access to external resources
Persistence Layer	Logs, Audit Trail, Back-ups	Record all actions for traceability

4 Key Differentiators

Feature	NexusAI	Chatbots	RPA Tools
Conversational AI			✗
Controlled Local Execution		✗	Limited
Persistent Memory		✗	✗
Audit Trail		✗	Basic
Human Validation		✗	✗
Capability Permissions		✗	Basic

5 Current Development Status

- Functional prototype with local execution
- Database connectivity (memory layer + documents)
- Log structure and audit trail
- Watcher as execution gateway
- Integration with OpenAI (operational reasoning)
- Backup and restore mechanisms
- Structured capability profiles

6 Next Milestones (with Launchpad funding)

1. Refine core architecture based on local pilot feedback
2. Develop user interface and dashboard
3. Run 6 pilots with Alabama-based companies

4. Launch marketing and sales operations
5. Prepare for seed funding round

7 Contact Information

Company:	HelpUS LLC
Address:	241 E 16TH AVE STE B4, Gulf Shores, AL 36542
EIN:	39-2099464
Founder:	Wagner Medeiros dos Santos
US Operations Manager:	Wagner M Carvalho
